

## Summary

I am a passionate and self-driven software developer with experience building projects across multiple areas of programming, including web applications, game systems, and real-time applications. I enjoy solving complex problems, learning new technologies, and turning ideas into functional and scalable solutions.

As a university student, I have developed strong technical and creative problem-solving skills through hands-on project experience. I am eager to continue growing as a developer by working on challenging and impactful software projects.
